

TOMIWA SAMUEL AKINBODE

Lead Product Designer & Design Engineer

Newcastle, United Kingdom | tomiwa1.dev@gmail.com | linkedin.com/in/tomiwaakinbode

PROFILE

Product Designer and Design Engineer with experience spanning AI, Fintech, Web3, and SaaS products. Combines product strategy, UX architecture and design systems work with hands-on front-end implementation (Webflow, AI-assisted development), owning work end-to-end from discovery through to production. Works natively with AI tools (Claude, Claude Code) throughout the design and build process to accelerate research, prototyping, documentation and delivery. Experienced designing for complex, systems-heavy domains including on-chain trading platforms, smart-account fintech products and SEO-driven marketing systems.

CORE SKILLS

Product & UX: Product Strategy, Product Discovery, UX Research, Information Architecture, Interaction Design, Design Systems, Product Ownership, Roadmapping

Design Engineering: Webflow Development, Responsive/Front-End Implementation, CMS Architecture, AI-Assisted Development (Claude Code)

Fintech & Web3: Smart Account UX, Wallet UX, DeFi, On-Chain Trading Interfaces — Ethereum, Solana, Sui, Flow, Optimism, Base, Polygon

Tools: Figma, FigJam, Webflow, Framer, Adobe Creative Suite, Miro

Ways of Working: Agile, Scrum, Backlog Management, Cross-Functional & Founder Collaboration

EXPERIENCE

Senior UI/UX Product Designer

Nebula-Q Protocol Ltd. (nQ-Swap Ecosystem) Apr 2026 – Present

Part-time, remote — reports to Founder/CEO

- Sole/lead designer for Klærus, an on-chain probability-trading protocol on Arbitrum, owning the entire product surface from landing page through the full trading application.
- Designed the trading terminal for mobile and desktop: asset, direction and timeframe selection, and live position management (cut-profit, stop-out, breakeven exit).
- Designed the admin dashboard (desktop) used for internal protocol management.
- Designed the public landing page and beta waitlist/sign-up flow; product is currently in closed beta.

Lead Design Engineer

Solloh Inc. Mar 2026 – Present

Works directly with company leadership across a ~20–30 person team

- Own end-to-end website production — from Figma design through Webflow development, deployment and CMS/hosting management — for client businesses.
- Solo-designed and built a 40+ page website for NorthStar Surgery Specialists, including procedure pages, CTA-optimised landing pages and SEO-focused content architecture.
- Executed on-page SEO, GEO and AEO strategy using AI-assisted workflows, driving the site to a 95 on-page SEO score, 472 organic keywords and 1,385 backlinks, with organic search generating 55.5% of traffic at a 63.7% engagement rate.
- Built reusable Webflow component systems and templates to reduce production time across client projects; integrated Claude Code into the build workflow.
- Site outcomes: 595,481 search impressions, 3,977 organic clicks and +40.8% user growth (Jan–Sept 2025); Google Business Profile generated 10,178 profile views and 299 direct calls.

Lead Product Designer

Entrypoint Labs Feb 2025 – Apr 2026

Early-stage Web3/fintech startup — owns end-to-end UX across the product portfolio

- Ultraprop (on-chain crypto prop-trading platform, Sui): designed the full trading experience — evaluation flows, live simulated trading, vault/funded-account structure, leaderboard and on-chain track-record credentialing. Currently in live testing ahead of public launch.
- Xend (USD smart-account app, Solana): designed the core account experience — balance/holdings view, send/receive-by-username transfers, and passkey-based sign-in and recovery (no seed phrases). Currently in private beta.
- Cortex (decentralised AI memory layer, Sui/Walrus/Seal): designed the product UX/UI in Figma, including the memory dashboard, onboarding flow and MCP integration flows.
- Uses AI (Claude) throughout for flow exploration, mockup iteration and design documentation, accelerating concept-to-prototype speed across all products.

Product Designer

Forj 2023 – Dec 2023

- Designed for Cryptosaurus, an NFT project — covering onboarding, avatar customisation, storytelling and fiat-to-NFT purchasing flows.
- Contributed to product prioritisation and backlog management alongside the core team.

Web Designer & Developer

6H Agency Jul 2022 – Dec 2022

- Designed dashboards and internal analytics tools for marketing-agency clients, working cross-functionally across design and delivery.
- Owned product requirements and prioritisation for client-facing dashboard products.

COMMUNITY & SPEAKING

- Active contributor to the Sui Nigeria blockchain community — designed materials for hackathons and community events.
- Speaker at a community event attended by approximately 3,000 people.
